PRICE STATISTICS OF ODISHA 2020

(PROVISIONAL)

(2013-14 to 2018-19)

***DIRECTORATE OF ECONOMICS AND STATISTICS,
ODISHA, BHUBANESWAR***

Sri Padmanabha Behera,

Hon'ble Minister,

*Planning & Convergence, Commerce & Transport,
Government of Odisha*

Message

*I am glad to know that the Directorate of economics and Statistics, Odisha, is going to release the report on “**Price Statistics of Odisha -2020**”.*

This report reflects a broad outlook on Farm harvest, Wholesale and Producers' prices of some essential agricultural commodities along with Livestock, Livestock products and by-products during the agricultural year 2013-14 to 2018-19.

The efforts made by Sri S. Sahoo, ISS, Director and officers of the Directorate of Economics and Statistics, Odisha in bringing out this report is highly appreciated.

A handwritten signature in blue ink, appearing to read 'M. Padma', with the date '25.08.2020' written below it.

(Padmanabha Behera)

Preface

Agricultural price policy plays an important role in achieving growth and equity in the state economy in general, and the agriculture sector in particular. Stabilisation of prices of essential agricultural commodities continues to remain an area of major concern. There is, thus a need to study the price behaviour of some essential agricultural commodities of the State.

*The Directorate of Economics and Statistics, Ministry of Planning and Convergence, Government of Odisha, is bringing out the publication on “**Price Statistics of Odisha -2020**” on the basis of monthly/ quarterly returns received from different market centres of the state.*

This publication relates to the price statistics during the agricultural year 2013-14 to 2018-19. The price data has been compiled on the basis of data received from districts on Farm harvest, Wholesale and Producers' prices of some essential agricultural commodities along with Livestock, Livestock products and by-products.

I hope the data presented in this Report will be of great help to the administrators, planners and general public in the formulation of policies relating to price.

I would like to record my appreciation for the untiring efforts made by the officers and staff of Price Division of this Directorate to bring out this publication in time.

Any suggestions for further improvement of this publication will be highly appreciated.

*Bhubaneswar
July 2020*

(S. Sahoo)

Miss Prabhatirani Pradhan
Joint Director
Directorate of Economics & Statistics
Odisha, Bhubaneswar

Acknowledgement

Price instability affects both producers and consumers. Stabilisation of prices plays a vital role in the overall growth and equity of the state economy in general, and the agriculture sector in particular. In the agriculture sector, constant application of latest information and better technologies is essential to enhance economic well-being of the farmer.

*The Directorate of Economics and Statistics, Ministry of Planning and Convergence, Government of Odisha, is bringing out the publication entitled "**Price Statistics of Odisha - 2020**" on the basis of data collected from different market centres of the state during the agricultural year 2013-14 to 2018-19. This publication provides some idea on Farm harvest, Wholesale and Producers' prices of some essential agricultural commodities along with Livestock, Livestock products and by-products in the state.*

I express my deep gratitude to Sri S.Sahoo, ISS, Director, Economics and Statistics, Odisha for his invaluable guidance and suggestions in preparation of this report.

Bringing out this publication, has involved meticulous work which has been carried out by Sri Byomakesh Patra, Assistant Director and staff of Price Division of this Directorate. The information published on price statistics would help in appropriate policy formulation.

It is hoped that this publication would be useful for researchers, policy makers and general public.

Suggestions for further improvement are most welcome.

Executive Summary

Farm Harvest Prices

- *Annual State Weighted Average Farm Harvest Prices in respect of cereal crops namely, paddy, wheat, maize and ragi have risen significantly over the years. The price for paddy, wheat, maize and ragi experienced growth rate of 33.6%, 20.4%, 37.7% and 77.8% respectively over the entire period (2013-14 to 2018-19). The period experienced highest growth in ragi prices.*
- *Among the pulses, the growth rate of Kulthi is highest, 61.7% followed by Biri and Mung with 31.5% and 23.2% respectively.*
- *Among the oilseeds, Til registered maximum growth of 66.3% followed by Mustard, 42.8% and Groundnut, 40.4%.*
- *For other cash crops, Sugarcane shows inflated rise of about 114% while the same for Potato and Jute are also significant i.e. about 47% and 45% respectively from 2013-14 to 2018-19.*

Wholesale Prices

- *Annual State Weighted Average wholesale Prices in respect of cereals, the price for Wheat, Maize and Ragi experienced growth rate of about 24.98%, 45.25% and 112.17% respectively over the period 2013-14 to 2018-19. The period exhibited highest growth in Ragi prices.*
- *Among the pulses, the growth rate of Kulthi is highest, 60.14% followed by Biri and Mung with 31.78% and 24.80% respectively.*
- *Among oil seeds, Til registered maximum growth of about 89.98% from 2013-14 to 2018-19 followed by Mustard, about 38.50% and Groundnut, about 26.10%.*

- *Sugarcane shows a rise of about 114.38% while the same for Potato and Jute is also significant i.e. about 47.81% and 46.41% respectively.*

Producer Prices (Livestock, its products & by-products)

- *The Annual State Average Prices of Animals and Birds have increased significantly for the period from 2013-14 to 2018-19.*
- *The overall growth rates of the Annual State Average Producers' Prices of Meat, Fish, Egg and Milk & Milk Products from the year 2013-14 to 2018-19 have increased significantly. The percentage growth of animal product like sheep meat has increased by 36.75% followed by other animal meats namely pig (34.74%), goat (34.53%), chicken (18.55%) and beef (7.28%).*
- *The average prices in respect of fish (fresh water) of big size & small size are showing growth rates of 18.86% & 3.46% and fish (saline water) of big size & small size are showing growth rates of 29.29% & 10.16% respectively. Similarly, the average prices in respect of egg (hen local), egg (hen improved), egg (duck) are showing the growth of 44.36%, 15.02% & 64.50% respectively.*
- *The milk and the milk products are also in the way of increasing trend for example, the growth of cow milk and buffalo milk have become 40.00% & 58.92% respectively are costlier.*
- *The growth of annual state average wholesale prices of different cattle feeds have also increased during the period from 2013-14 to 2018-19. The growth of the bran (nada) shows the highest percentage i.e, 187.46% followed by gram (80.44 %), oil cakes (56.43%), crushed pulses (51.95%), salt (42.55%), molasses (35.30%) and grain (20.13%) in the last six years.*

CHAPTER I

Introduction

Prices affect all sections of society and as such Price Statistics are regarded as the most important economic data which reflect the changes in economic activities. Prices influence both quantum and pattern of consumption. As such price stability is essential for sustaining the momentum of growth and ensuring proper distribution of the benefits of development. This is considered world-over as a crucial pre-condition for sustained growth in economic activity and employment. Therefore it is absolutely essential to keep a constant watch on price behavior. Moreover analysis of data on prices is an important component in the monitoring of progress and health of an economy.

The prices of goods that come across in the market are of different types. Important of them are wholesale prices, retail prices and other prices such as producer prices, factory gate prices, farm harvest prices, procurement prices, etc.

The price collection scheme is in operation in the Directorate of Economics and Statistics, Odisha since 1975. At present, the following prices are being collected:

1. Farm Harvest Price
2. Wholesale Price of Agricultural Goods
3. Producers' price of live-stock & their product
4. Wholesale price of cattle feed

1.1 Objective

The price data is being collected through different schedules in Odisha with the following objectives:

- To collect and compile Price Statistics.
- To study price movement of various commodities.

- To prepare State Weighted Average Farm Harvest Price for onward transmission to the Ministry of Agriculture, Government of India, New Delhi.
- To prepare Annual State Weighted Average Wholesale Price to be used in different publications like Economic Survey of Odisha, Statistical Abstract and for the compilation of State Domestic Product as well as District Domestic Product.
- To prepare the Annual State Average price & District Average price on Live Stocks, its products and by- products, cattle feed for the compilation of State Domestic Product as well as District Domestic Product.

1.2 Utility of Price data for the benefit of the state & people:

The price data are being used for the following purposes.

- i. Estimation of State Income.
- ii. Fixation of procurement and support prices.
- iii. Construction of parity indices.
- iv. Preparation of Producers' price indices.
- v. Taking up adhoc studies on the economic condition of farmers and other analytical studies

1.3 Scope & Coverage:

The entire State covering all Subdivisions and almost all crops produced in the State along with other items and items on various domestic animals and birds, animal products and by-products, meat, fish, egg, milk and milk products have been brought under the scope of price collection. In addition to these, Rural & Urban retail prices of various consumer items are being collected. At present, coverage in respect of area and items for each type of work are as follows:

- I. Farm Harvest prices of Agricultural commodities in Schedule-1 are being collected from the 116 selected feeding villages tagged with 116 primary markets.
- II. Producers' prices of Agricultural commodities in Schedule-1 are also collected in Schedule-1 from the feeding village or Primary market.
- III. Wholesale prices of Agricultural commodities for Schedule-2 are being collected either from the selected primary markets or the Business centres like Mundies, Mills etc.

- IV. Only one selected Cattle Market is covered under collection of Producers' prices of Animals & Birds for Schedule-4 in each district.
- V. Only one Centre i.e. District Headquarters is covered under the collection of Producers' prices of Milk & Milk product, Meat, Fish & Egg (Schedule-5) in each district.
- VI. The Producers' prices of Animal product & By-product are also collected in Schedule-6 from the District Headquarters of the State.
- VII. The Wholesale prices of cattle feed (Schedule-7) are being collected from 30 District Headquarters of the state.

The present report highlights on different aspects of all above prices.

1.4 Limitations:

In estimation of Annual State Weighted Average of Farm Harvest Prices, certain discrepancies in the data have been observed in case of Paddy in some districts. In anticipation of receipt of necessary compliances from those districts, the data on Farm Harvest Prices have been replaced with Minimum Support Prices (MSP) as majority of produces are sold by the farmers in MSP through procurement by state government. Hence, the table showing the Annual State Weighted Average of Farm Harvest Prices and District Average of Farm Harvest Prices now reflected in the report may be treated as provisional.

Similarly, in estimation of Annual State Weighted Average of Wholesale Prices, certain discrepancies in the data have been observed and therefore, the data on Wholesale Prices of Paddy have been replaced with Minimum Support Prices (MSP). Hence, the table showing the Annual State Weighted Average Wholesale Prices and District Average Wholesale Prices now reflected in the report may be treated as provisional.

CHAPTER II

Farm Harvest Prices

Rise in agricultural prices, measured by annual average prices, does not represent the price situation faced by the farmers in the country. Most of the farmers dispose of their produce immediately after the harvest in a low price due to their poor ability to hold stock and this practice does not benefit the farmer. The price that really matters to the farmers is thus the harvest price. Therefore, it is pertinent to examine whether the level of harvest prices has risen along with the rising trend of agricultural prices during the last few years.

2.1 State Weighted Average Farm Harvest Prices

Farm Harvest Price is defined as an average price at which the commodity in bulk is disposed of by the producer at the village site during the specified harvest period. Farm Harvest Price is being collected within 6-8 weeks of harvest for both Kharif and Rabi Seasons. These Prices are collected in respect of almost all the agricultural crops produced in the state. Out of those, the major thirteen Agriculture Commodities are 1.Paddy, 2.Wheat, 3.Maize, 4.Ragi, 5.Mung, 6.Biri, 7.Kulthi, 8.Til, 9.Mustard, 10.Groundnut, 11.Jute, 12.Potato and 13.Sugarcane.

The State Weighted annual average Farm harvest prices of the agricultural crops are being calculated by giving their district-wise production as the weights and are used by the State Income Unit, Directorate of Economics & Statistics, Odisha for estimation of GSDP of state.

Table-1 Annual State Weighted Average Farm Harvest Prices of 13 Principal Agricultural Crops in Odisha
(Rupees / Quintal)

Sl. No	Name of the Crops	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	Growth over 6 years
1	Paddy *	1310.00	1360.00	1411.60	1470.00	1553.20	1750.00	33.6
2	Wheat	1476.34	1511.70	1650.67	1716.41	1718.99	1778.07	20.4

13	Sugarcane	158.00	193.77	240.17	266.09	282.62	338.80	114.4

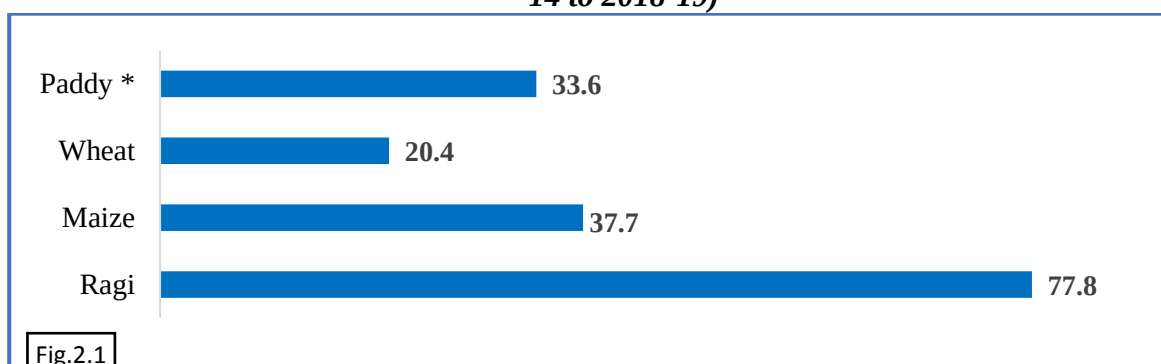

* Provisional figures

The data above show a continuous increase in Farm Harvest prices for all commodities during the period 2013-14 to year 2018-19. The detailed behaviors of cereal, pulses and oil seeds and others major crops are described below.

2.1.1 Cereals

A deep insight of changing growth rate of different cereals is depicted in fig. no-2.1 below.

Growth of Weighted Average Farm Harvest Prices of Cereals over past six years (2013-14 to 2018-19)

The farm harvest prices in respect of cereal crops namely, paddy, wheat, maize and ragi have risen significantly. In 2013-14, the weighted average farm harvest price for paddy (common) was Rs.1310/qtl., which increased to Rs.1750/qtl in 2018-19 (Table-1). The growth rate was 33.6 per cent for the entire period (2013-14 to 2018-19). Similarly, the price for wheat, maize and ragi experienced growth rate of 20.4 per cent, 37.7 per cent and 77.8 per cent respectively over the same period. The period experienced highest growth in ragi prices.

Year to year variation of Cereals

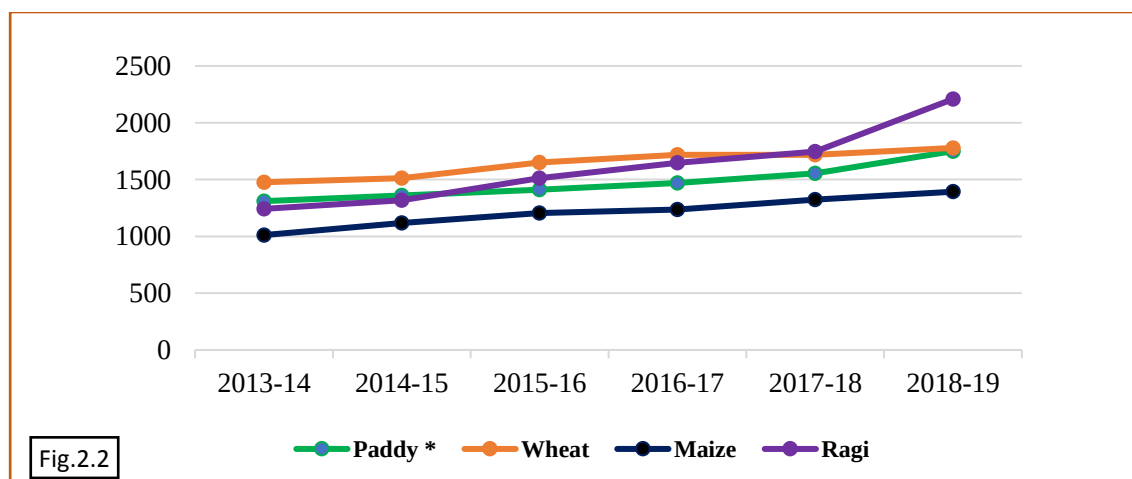

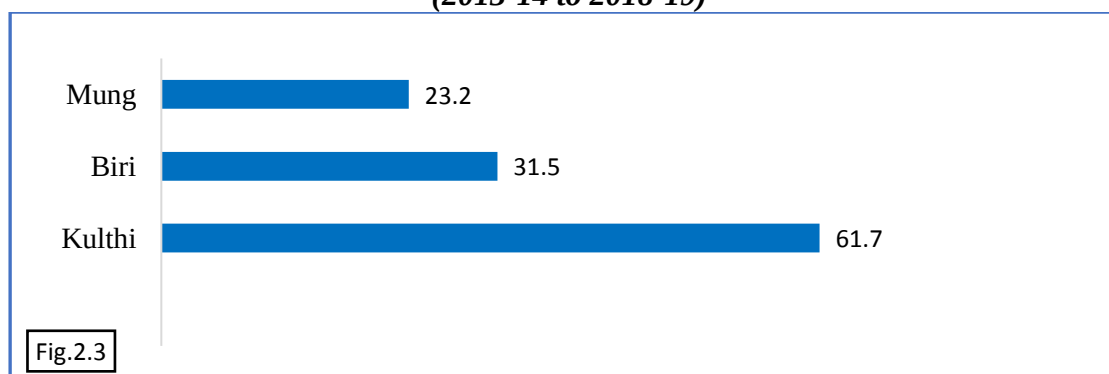

Fig. 2.2 presents information on variation of weighted average farm harvest price of cereals through past six years. All the four cereal items show regular increase in price over time. Paddy, the most concerned one showed a price rise of about 4 per cent growth for the beginning three years of our report i.e. till 2016-17. Then the rate was rise up to 5.7 per cent in 2017-18 and in 2018-19 it again resumes rise with about 12.7 percent growth rate. The cases of wheat and maize were more or less the same. Ragi exhibited the highest and consistent price rise over the time, perhaps due to introduction of millet mission in the state.

2.1.2 Pulses

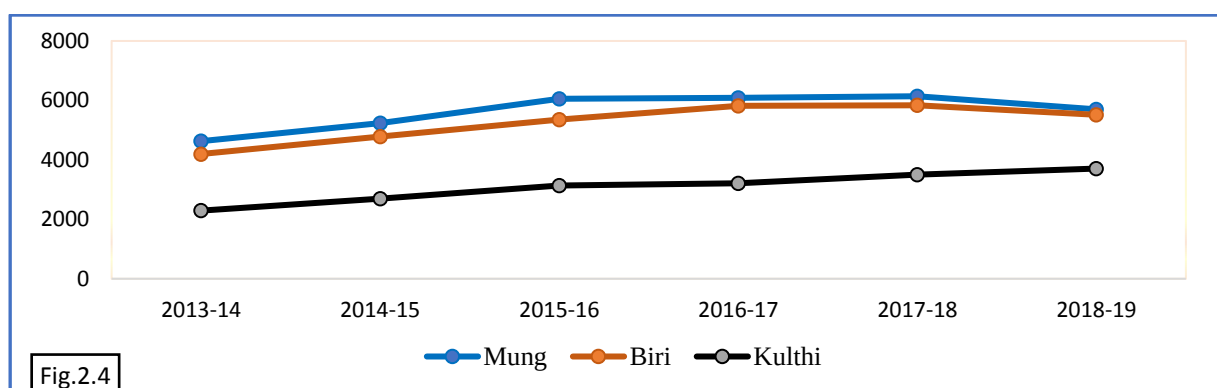

Figure 2.3 depicts the overall growth of Annual State Weighted average Farm harvest prices of the pulses from the year 2013-14 to 2018-19.

Growth of Weighted Average Farm Harvest Prices of Pulses over past six years (2013-14 to 2018-19)

The growth of all types of pulses like Mung, Biri & Kulthi are higher than the cereal items except Ragi. It is observed from the figure that among the pulses, the growth rate of Kulthi is highest, 61.7% followed by Biri and Mung with 31.5% and 23.2% respectively.

Variation of Pulses through Time

The variation of Kulthi over past six years represents approximately a straight line with upward slope. Mung and Biri show increasing curvilinear trend as the end points are slightly bending downwards representing negative growth of about -7% and -5% for respectively from 2017-18 to 2018-19.

2.1.3 Oil Seeds and other major crops

Growth of Weighted Average Farm Harvest Prices of Oilseeds and other major crops over past six years (2013-14 to 2018-19)

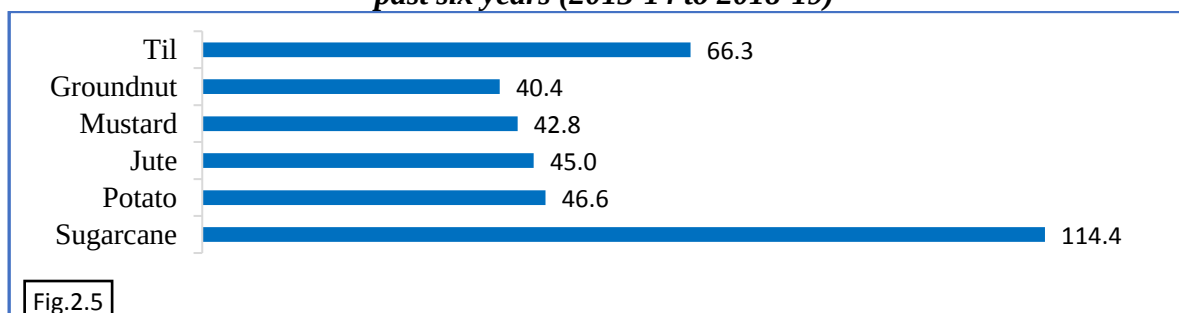

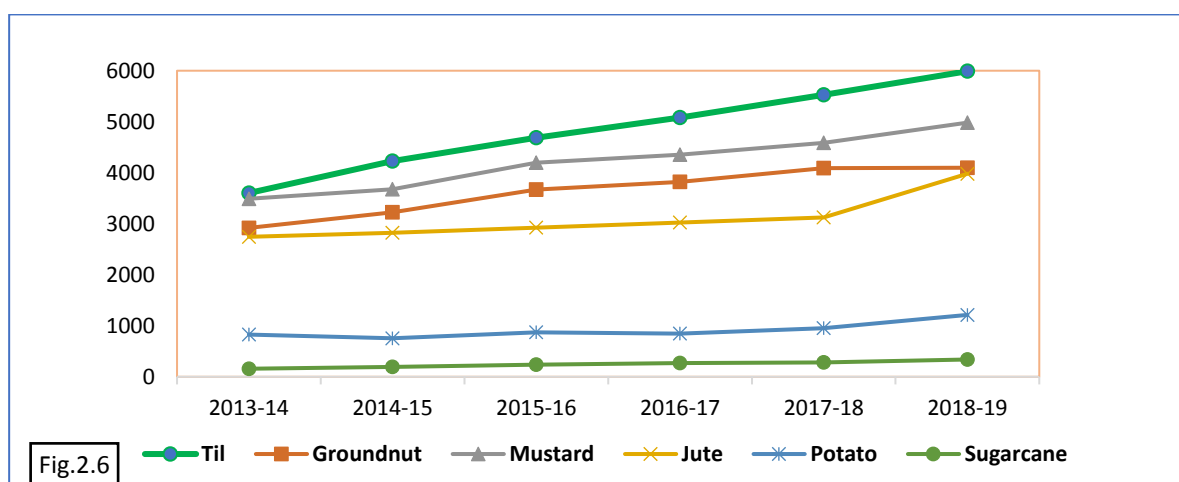

Figure 2.5 is the vivid representation of the annual growth of weighted average farm harvest prices oilseeds, jute, potato and sugarcane over time. Among oilseeds, Til registered maximum growth of 66.3% from 2013-14 to 2018-19 followed by Mustard, 42.8% and Groundnut, 40.4%. Sugarcane shows inflated rise of about 114% while the same for Potato and Jute is also significant i.e. about 47% and 45% respectively. Figure 2.6 is the comprehensive depiction of the weighted average farm harvest prices of oil seeds, fiber, sugarcane and potato mentioned through past six years.

Variation of Weighted Average Farm Harvest Prices of Oilseeds and other major crops through Time

2.2 Annual State Average Farm Harvest Prices

This section investigates growth and variability in the annual state average farm harvest prices of the selected crops. The Table below attempts to assess the changes of prices of thirteen major crops of the state along with their growth over the years and tries to quantify the extent of annual price fluctuation in Farm harvest prices.

Table-2 Annual state average of farm harvest price of 13 principal agricultural crops in Odisha

(Rupees / Quintal)

Sl. No	Name of the Crops	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	Growth over 6 years
1	Paddy *	1310.0	1360.0	1411.6	1470.0	1553.2	1750.0	33.6
2	Wheat	1495.2	1558.6	1603.5	1663.0	1727.3	1785.8	19.4

11	Jute	2843.2	2888.5	2932.4	3390.8	3122.3	3937.5	38.5
12	Potato	854.9	778.7	901.8	843.9	964.3	1197.2	40.0
13	Sugarcane	175.3	220.6	251.5	278.6	322.2	328.0	87.1

* Provisional figures

As observed in case of weighted average, state average also show highest price rise in Sugarcane with 87.1% followed by Ragi with 66.9%. Kulthi, Maize, Groundnut and Til exhibited more than 50% hike. Paddy reported about 33.6% growth over six years. Fig-2.7 demonstrates the above fact.

Growth rate of annual state average of farm harvest price of 13 major crops over last six years (2013-14 to 2018-19)

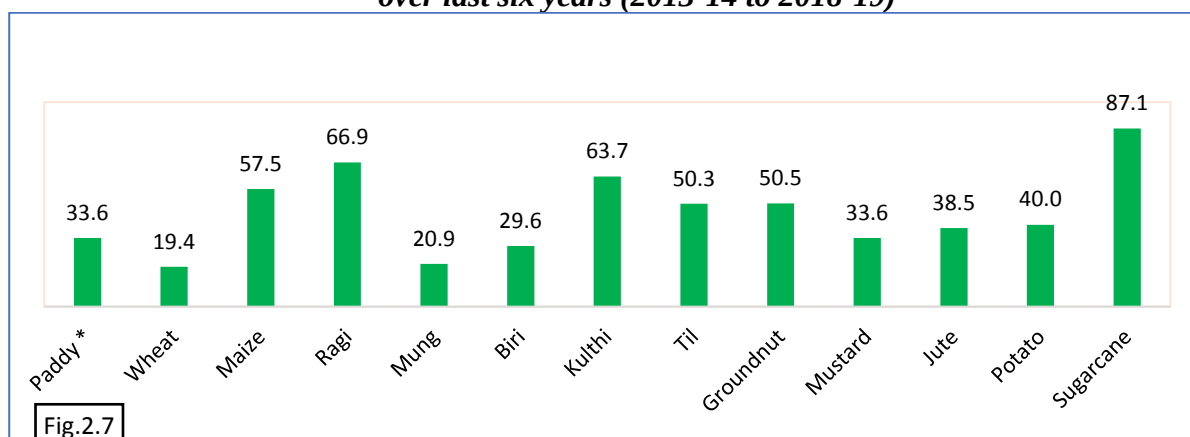

Fig.2.7

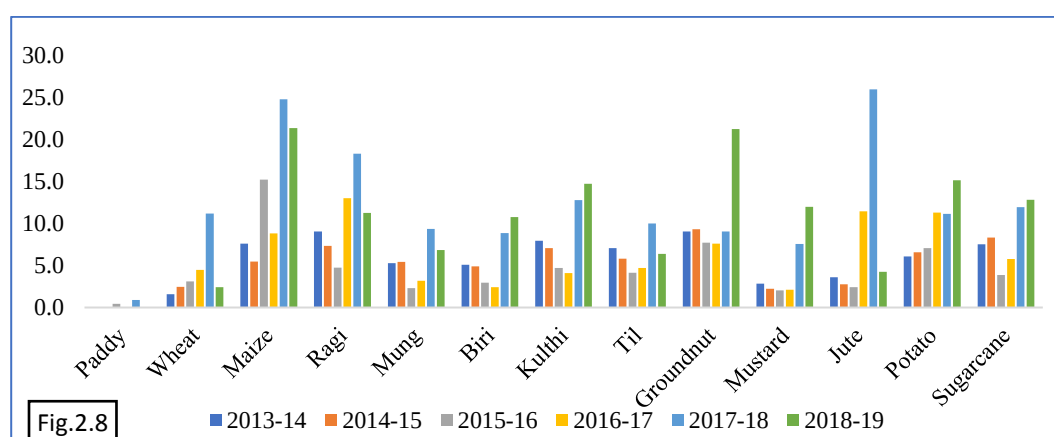

The dynamics of growth and change in the prices of selected commodities at the state level usually hides the diversity of changes that occur in individual districts. Therefore, it is important to analyse variations in the prices of the commodities with its standard deviation to understand the true dynamics that characterize movements in prices.

The inter-district co-efficient of variation in the annual state average farm harvest prices of the major thirteen agricultural commodities for the years 2013-14 to 2018-19 is placed at Table-3. Variability in prices is estimated by using districts price variation, i.e. price change among districts in a given year.

Table-3 Co-efficient of variation in annual district average of farm harvest price of 13 major crops in last six years

Crop	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19
Paddy	0.0	0.0	0.4	0.0	0.9	0.0
Wheat	1.6	2.4	3.1	4.5	11.2	2.4
Maize	7.6	5.5	15.2	8.8	24.8	21.4
Ragi	9.1	7.3	4.8	13.0	18.3	11.3
Mung	5.3	5.4	2.3	3.2	9.3	6.8
Biri	5.1	4.9	3.0	2.4	8.9	10.8
Kulthi	7.9	7.1	4.7	4.1	12.8	14.7

Sugarcane	7.5	8.3	3.9	5.8	11.9	12.8

Co-efficient of variation in inter-district annual averages of Farm harvest price of 13 major crops in last six years

2.3 District Average Farm Harvest Prices

The data on farm harvest prices of major crops have been collected by this directorate from 116 primary markets selected on a purposive basis during the harvest period of six to eight weeks. Then the fortnightly prices were combined into district averages through their simple arithmetic mean.

In case of the principal crop of the state i.e, Paddy, since majority of the produce are sold out in mandies by the farmers in MSP through procurement by state government, no inter-district variation is noticed. However, for all other major crops, it is clearly visible. Table-4 shows district wise percentage growth of annual average farm harvest price of some major crops of Odisha over the period from 2013-14 to 2018-19.

Table-4 Percentage growth of District Average Farm Harvest Prices of major crops over last six years. (contd.)

Dist name	Wheat	Maize	Ragi	Mung	Biri	Kulthi
Angul	19.4	90.7	61.6	36.6	22.5	80.7

Sundargarh	56.8	94.9	44.3	-	41.5	-

2.3.1 Maize:

The figure 2.9 given below depicts the growth of Annual district average Farm harvest prices of Maize from the year 2013-14 to 2018-19. It is observed from the figure that among the districts, Sambalpur reported the highest increase with 119.8% followed by Sonepur (97.9), Bargarh (97.7) and Angul (90.7). These districts constitute the top group in the state regarding rise in Maize price is concern. Kandhamal is the only district which has a negative growth of Maize prices of only (-)1.9% over a six-year long gap.

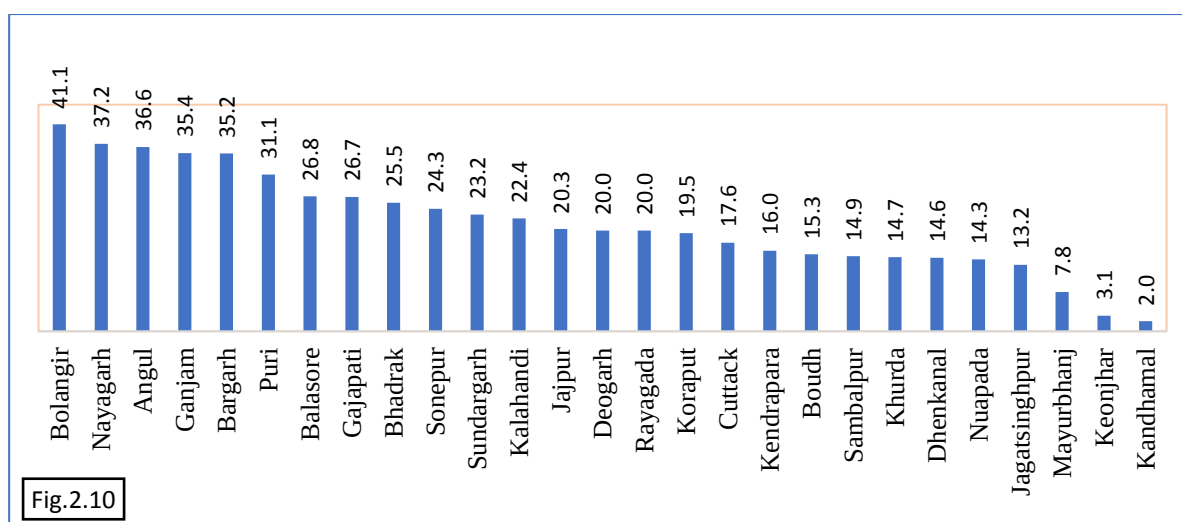

Growth rate of Maize over 6 years (2013-14 to 2018-19)

2.3.2 Mung:

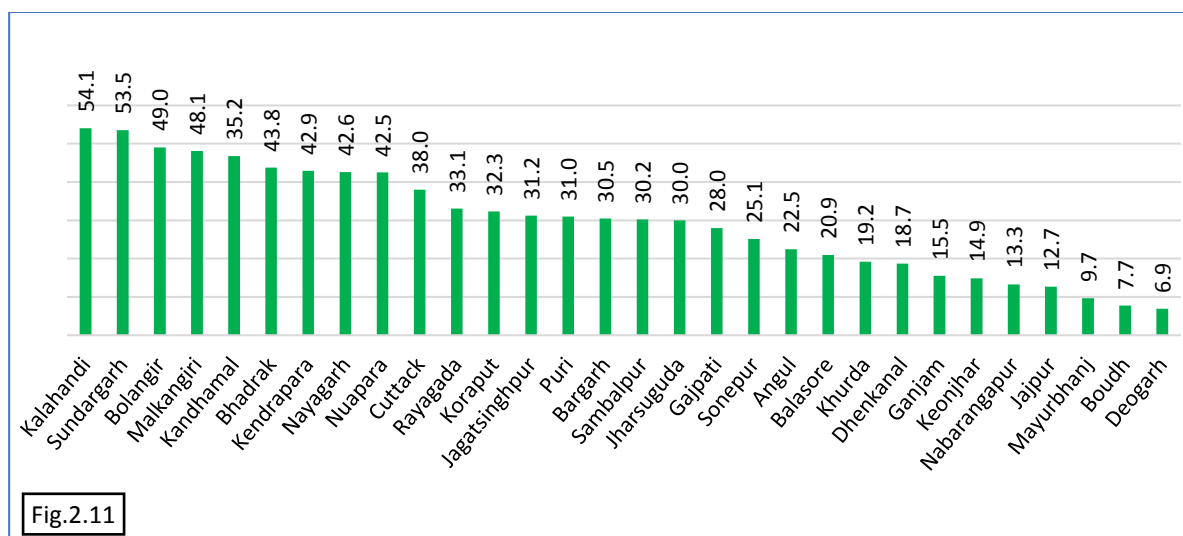

The Annual District Average Farm Harvest Prices of Mung (Rupees/Quintal) along with its growth rate over last six years is presented in Table 5 (List of Tables). The figure 2.10 given below depicts the growth of Annual district average Farm harvest prices of Mung from the year 2013-14 to 2018-19. It is observed from the figure that among the districts, Bolangir reported the highest increase with 41.1% followed by Nayagarh (37.2), Angul (36.6) and both Ganjam and Bargarh (35.4 & 35.2). These districts constitute the top five group in the state regarding rise in Mung price. Kandhamal occupied the bottom most position with a concerning low rise of only 2% over a six-year long gap. Also Keonjhar is very close to it (3.1%).

Growth rate of Mung over 6 years (2013-14 to 2018-19)

2.3.3 Biri

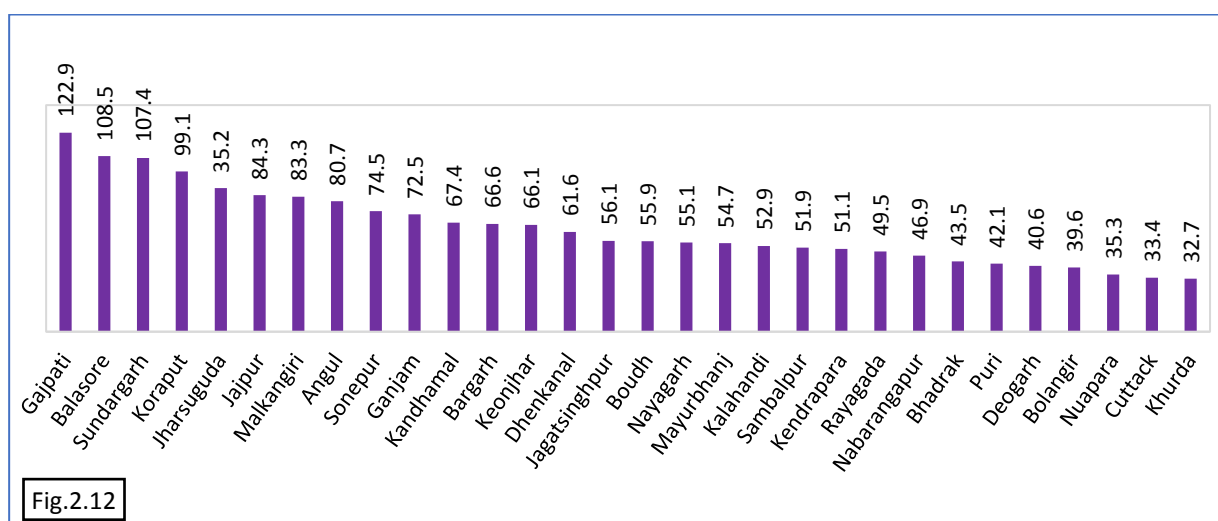

Growth rate of Biri over 6 years (2013-14 to 2018-19)

The Annual District Average Farm Harvest Prices of Biri (Rupees/Quintal) along with its growth rate over last six years in Odisha is presented in Table 6 (List of Tables). It is observed that the Farm harvest prices for Biri has risen significantly over the past six years for almost all the districts (fig-2.11). The growth rate is more than 50 per cent for Kalahandi (54.1%) and Sundargarh (53.5%) over the entire period (2013-14 to 2018-19). Bolangir (49.0%) and Malkangiri (48.1%) districts also have shown substantial rise in this regard. Deogarh, Boudh and Mayurbhanj are the only districts which report single digit growth rates.

2.3.4 Kulthi

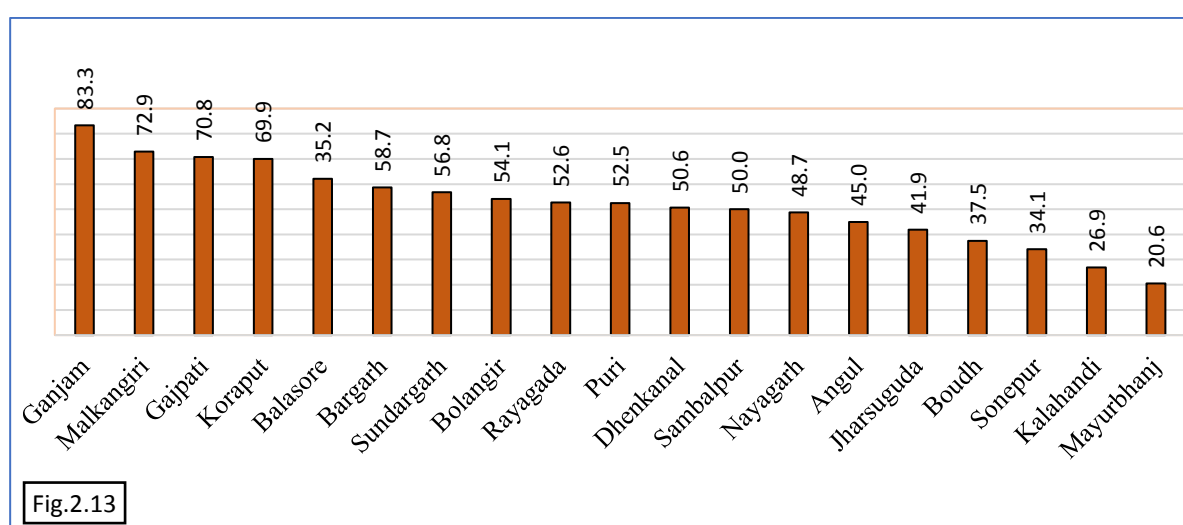

Growth rate of Kulthi over 6 years (2013-14 to 2018-19)

The Annual District Average Farm Harvest Prices of Kulthi (Rupees/Quintal) along with its growth rate over last six years in Odisha is presented in Table 7 (List of Tables). The district average farm harvest prices and growth rate of Kulthi in all the major producing districts of Odisha for the years between 2013-14 and 2018-19 is provided in Table. The districts of Gajapati, Balasore and Sundargarh are observed to report significant growth at three digit rates while the rate of increase in prices received by the farmers are lowest for Khurda and Cuttack through time. Fig-2.12 is the vivid representation of the fact.

2.3.5 Til

Growth rate of Til over 6 years (2013-14 to 2018-19)

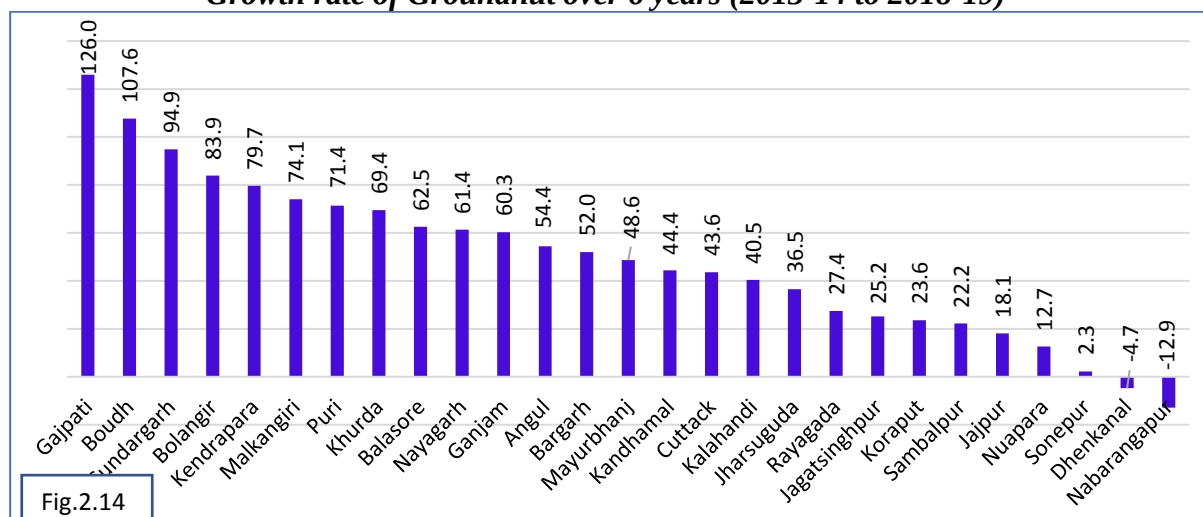

The figure 2.13 depicts the growth of Annual district average Farm harvest prices of Til from the year 2013-14 to 2018-19. It is observed from the figure that among the districts, Ganjam reported the highest increase with 83.3% followed by Malkangiri (72.9), Gajapati (70.8) and Koraput (69.9) and Mayurbhanj reported a lowest growth of 20.6% over a period of six-years.

2.3.6 Groundnut

The Annual District Average Farm Harvest Prices of Groundnut (Rupees/Quintal) along with its growth rate over last six years in Odisha is presented - in Table 9 (List of Tables). The growth rate of Groundnut over six years given below in figure 2.14 indicates that Gajapati and Boudh reported more than hundred percent growth and Dhenkanal and

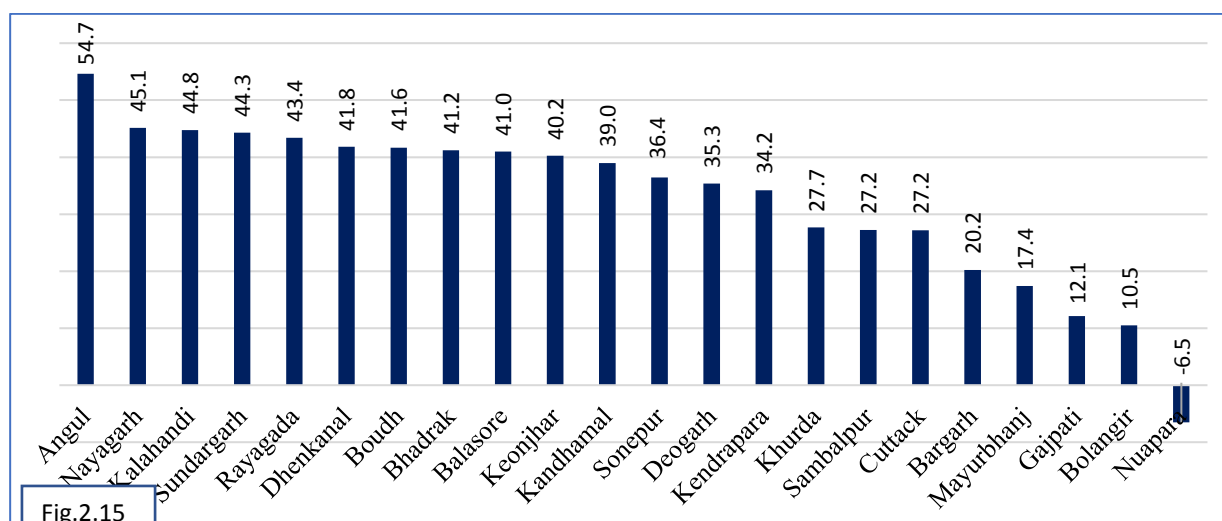

Nabarangapur districts shown a negative growth from 2013-14 to 2018-19 in the farm harvest price of Groundnut. Almost all the districts shown a notable temporal change in the farm harvest prices.

Growth rate of Groundnut over 6 years (2013-14 to 2018-19)

2.3.7 Mustard

Growth rate of Mustard over 6 years (2013-14 to 2018-19)

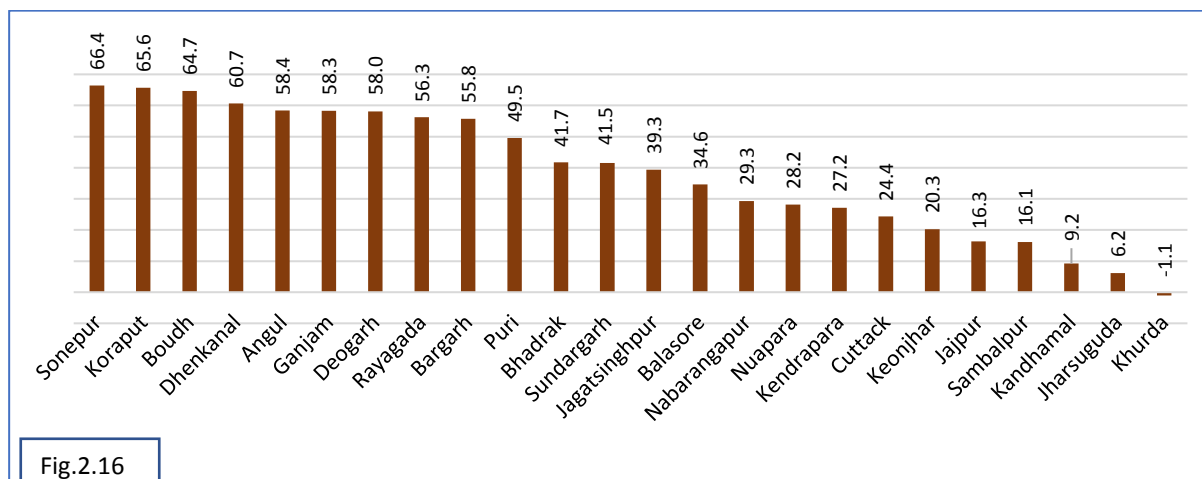

The figure 2.15 depicts the growth of Annual district average Farm harvest prices of Mustard from the year 2013-14 to 2018-19. It is observed from the figure that among the districts, Angul reported the highest increase with 54.7% followed by Nayagarh (45.1) and Kalahandi (44.8). Nuapara is the only district which has a negative growth of (-)6.5% as far as Mustard price is concern.

2.3.8 Potato

The growth rate of Potato over six years given below in figure 2.16 indicates that Sonepur, Koraput, Boudh and Dhenkanal are four districts who reported more than sixty percent growth and Khurda is the only district, that shown a negative growth from 2013-14 to 2018-19 in the farm harvest price of potato.

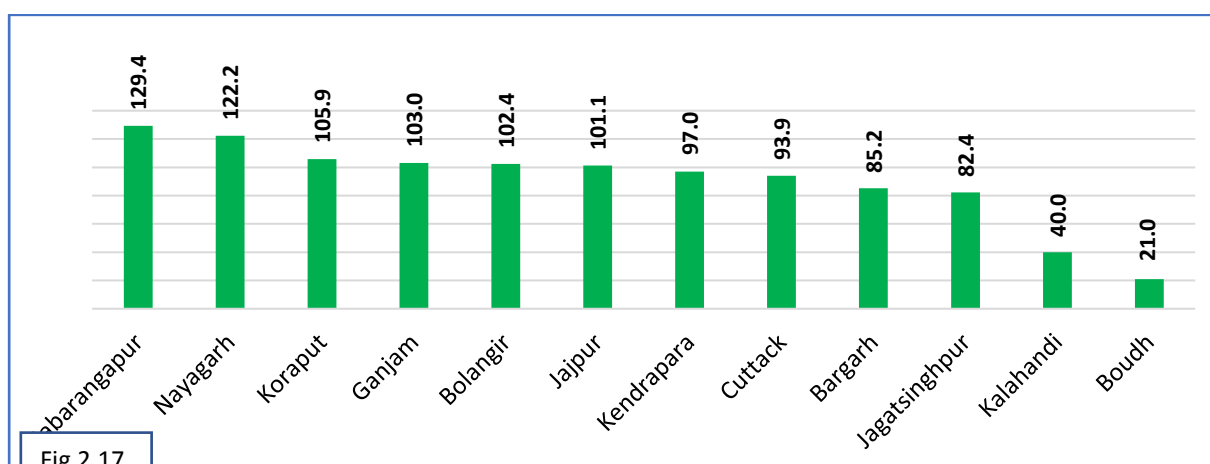

Growth rate of Potato over 6 years (2013-14 to 2018-19)

2.3.9 Sugarcane

The figure 2.17 depicts the growth of Annual district average Farm harvest prices of Sugarcane from the year 2013-14 to 2018-19. It is observed from the figure that almost all the districts reported more than 80% growth except Kalahandi (40.0) and Boudh (21.0) districts over a period of six-years.

Growth rate of Sugarcane over 6 years (2013-14 to 2018-19)

2.4 In terms of percentage growth over the last six years, the prices of top five districts and the prices of bottom five districts of some major crops are presented below.

Table-5 *Group of top five districts regarding highest farm harvest prices of some major crops during 2018-19*

Sl. No.	Name of the Crops	Name of the districts				
1	Maize	Deogarh	Sambalpur	Sonepur	Bargarh	Jajpur
2	Mung	Angul	Sundargarh	Bolangir	Sonepur	Rayagada
3	Biri	Kalahandi	Kandhamal	Sundargarh	Bolangir	Malkangiri
4	Kulthi	Sundargarh	Balasore	Jharsuguda	Gajpati	Koraput
5	Til	Ganjam	Koraput	Nabarangapur	Gajpati	Kandhamal
6	Groundnut	Boudh	Deogarh	Gajpati	Malkangiri	Sundargarh
7	Mustard	Jharsuguda	Angul	Malkangiri	Nayagarh	Dhenkanal
8	Potato	Malkangiri	Nayagarh	Boudh	Sonepur	Dhenkanal
9	Sugarcane	Bhadrak	Nayagarh	Nabarangapur	Deogarh	Keonjhar

Table-6 *Group of bottom five districts regarding lowest farm harvest prices of some major crops during 2018-19*

Sl. No.	Name of the Crops	Name of the districts				
1	Maize	Kandhamal	Nabarangapur	Gajpati	Ganjam	Jharsuguda
2	Mung	Kandhamal	Jagatsinghpur	Khurda	Nabarangapur	Kendrapara
3	Biri	Jajpur	Mayurbhanj	Dhenkanal	Deogarh	Ganjam
4	Kulthi	Cuttack	Bolangir	Khurda	Jagatsinghpur	Puri
5	Til	Keonjhar	Mayurbhanj	Bolangir	Kalahandi	Bargarh
6	Groundnut	Nabarangapur	Dhenkanal	Sonepur	Jajpur	Koraput
7	Mustard	Nuapara	Bolangir	Mayurbhanj	Gajpati	Bargarh
8	Potato	Khurda	Kalahandi	Kandhamal	Jharsuguda	Jajpur
9	Sugarcane	Boudh	Gajpati	Kalahandi	Sambalpur	Bargarh

CHAPTER III

Wholesale Prices

Wholesale Price is defined as an average price at which the commodity in bulk quantities is transacted, generally for further sale. These Prices are collected in respect of almost all the agricultural crops produced in the state. Out of those, the major thirteen agriculture commodities are 1.Paddy, 2.Wheat, 3.Maize, 4.Ragi, 5.Mung, 6.Biri, 7.Kulthi, 8.Til, 9.Mustard, 10.Groundnut, 11.Jute, 12.Potato and 13.Sugarcane.

The Annual State Weighted Average Wholesale prices of the agricultural crops are being calculated by giving the district wise production as the weights. The weighted average Wholesale Prices of major thirteen Agricultural Commodities for the years 2013-14 to 2018-19 is placed at Table 7.

Table-7: Annual State Weighed Average Wholesale Prices of 13 Principal Agricultural Crops (Rupees/ Quintal)

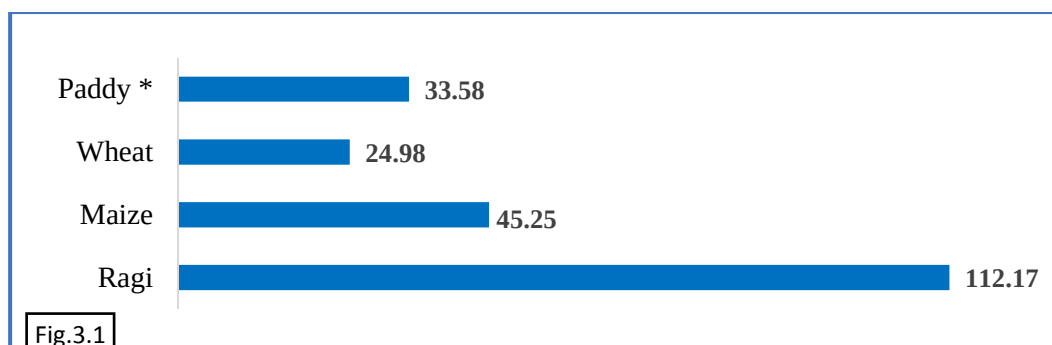

Sl. No	Name of the Crops	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	Growth over 6 years
1	Paddy*	1310.00	1360.00	1411.60	1470.00	1553.20	1750.00	33.58
2	Wheat	1554.59	1555.73	1656.53	1747.31	1740.30	1942.99	24.98
3	Maize	1131.59	1217.92	1293.93	1336.88	1381.49	1643.58	45.25
4	Ragi	1310.08	1469.14	1678.61	1719.57	1798.43	2779.57	112.17
5	Mung	4837.28	5536.02	6099.20	6239.32	6193.52	6036.88	24.80
6	Biri	4370.69	5034.18	5870.01	6037.98	5976.92	5759.55	31.78
7	Kulthi	2576.06	2845.99	3266.32	3299.14	3582.13	4125.38	60.14
8	Til	3981.15	4673.85	4983.91	5267.28	5570.91	7563.26	89.98
9	Groundnut	3412.04	3821.95	3855.03	4040.22	4141.54	4302.62	26.10
10	Mustard	3739.11	4058.18	4296.18	4440.73	4620.46	5178.71	38.50
11	Jute	2845.63	2954.69	3041.29	3301.49	3615.60	4166.31	46.41
12	Potato	1110.66	1071.95	1106.61	918.00	958.18	1641.70	47.81
13	Sugarcane	180.53	238.84	246.20	277.85	286.66	387.02	114.38

* Provisional figures

The data above show a continuous increase in Wholesale prices for all most all commodities during the period 2013-14 to year 2018-19. The detailed behavior of cereal, pulses, oil seeds and others major crops are described below.

3.1.1 Cereals

Growth of Weighted Average Wholesale Prices of Cereals over past six years (2013-14 to 2018-19)

The wholesale prices have risen significantly all of the three cereal crops. In 2013-14, the weighted average wholesale price for paddy (common) was Rs. 1310/qtl., which increased to Rs.1750/qtl in 2018-19 (Table 7) in a growth rate of 33.58 per cent. Similarly, the price for Wheat, Maize and Ragi experienced growth rate of about 25, 45 and 112 per cent over the same period respectively. The period experienced highest growth in Ragi prices.

Year to year variation of Weighted Average Wholesale Prices of Cereals

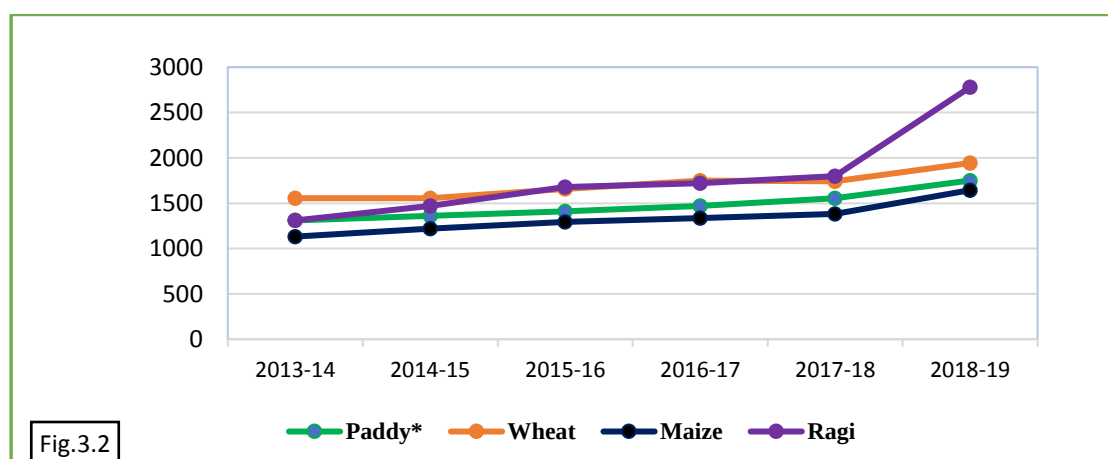

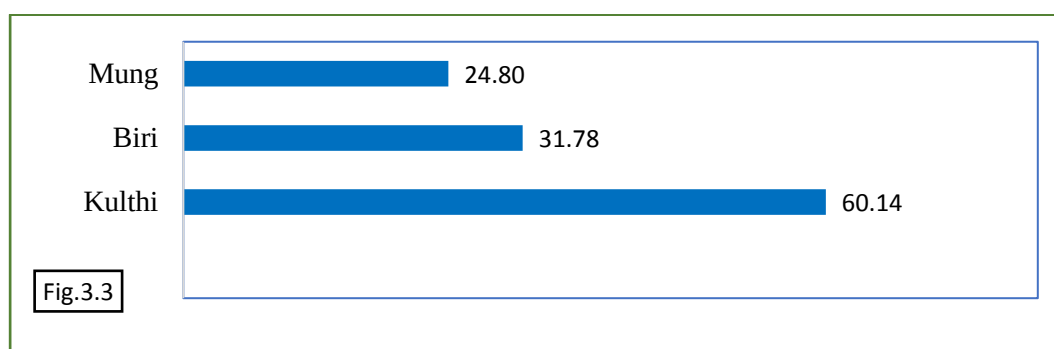

Fig. 3.2 presents information on variation of weighted average wholesale price of cereals through past six years. All the four cereal items shown regular increase in price over time. Paddy, the most concerned one showed a consistent price rise for all the years under report. The cases of wheat and maize were more or less the same. Ragi exhibited the highest and steady price rise over the time.

3.1.2 Pulses

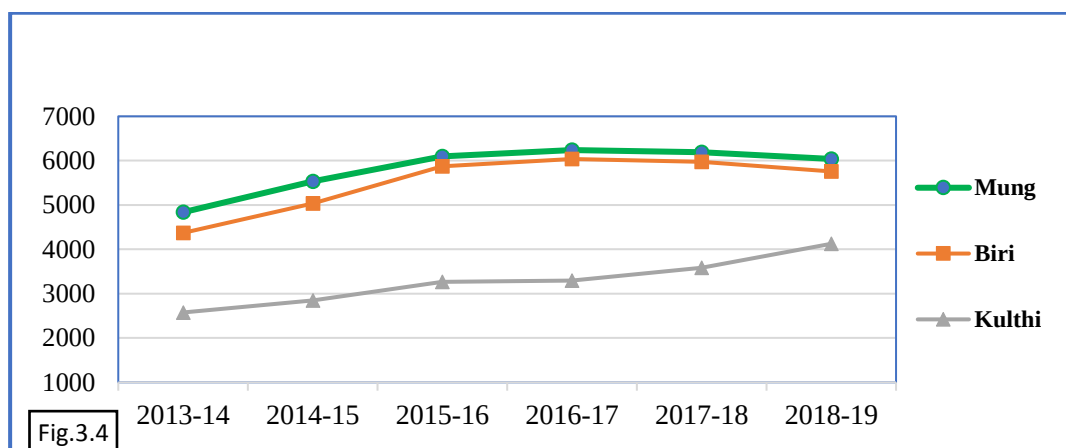

Figure 3.3 represents the overall growth of annual state weighted average wholesale prices of the pulses from the year 2013-14 to 2018-19.

***Growth of Weighted Average Wholesale Prices of Pulses over past six years
(2013-14 to 2018-19)***

It is observed from the figure that among the pulses, the growth rate of Kulthi is highest, 60.14% followed by Biri and Mung with 31.78% and 24.80% respectively.

Year to year variation of Weighted Average Wholesale Prices of Pulses

The variation of Kulthi over past six years represents approximately a straight line with upward slope. Mung and Biri show increasing curvilinear trend as the end points are slightly bending downwards representing negative growth of about -2.5% and -3.6% for respectively from 2017-18 to 2018-19.

3.1.3 Oil Seeds and other major crops

Growth of Weighted Average Wholesale Prices of Oilseeds and other major crops over past six years (2013-14 to 2018-19)

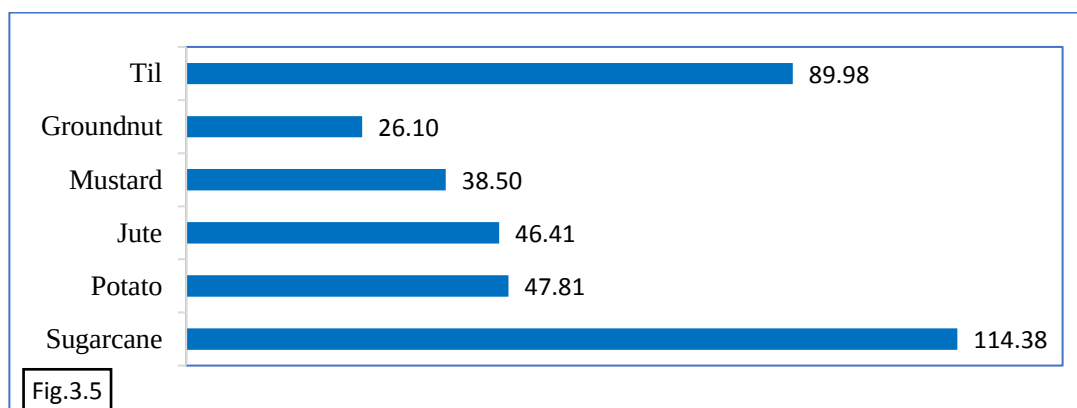

Figure 3.5 is the graphic representation of the annual growth of wholesale prices of oil seeds, jute, potato and sugarcane over time. Among oil seeds, Til registered maximum growth of about 90% from 2013-14 to 2018-19 followed by Mustard, about 39% and Groundnut, about 26%. Sugarcane shows inflated rise of about 114% while the same for Potato and Jute is also significant i.e. about 48% and 46% respectively.

Year to year variation of Weighted Average Wholesale Prices of Oilseeds and other major crops

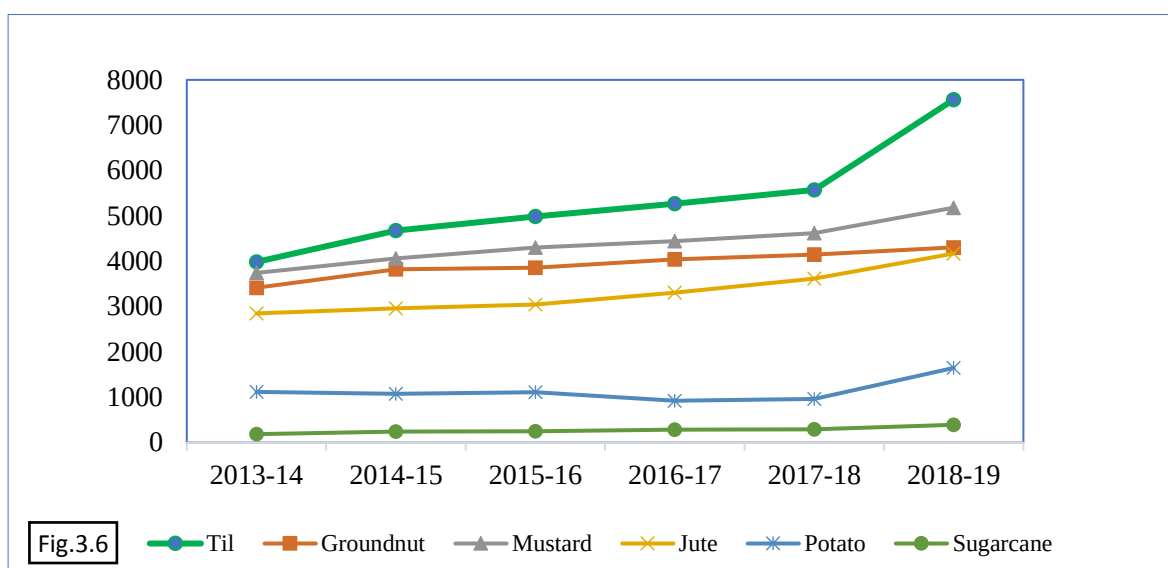

Figure 3.6 is the comprehensive depiction of the weighted average wholesale prices of all the commodities mentioned through past six years.

3.2 Annual State Average Wholesale Prices

This section investigates growth and variability in the annual state average wholesale prices of the selected crops.

Table-8: Annual State Average of Wholesale price of 13 major crops with Co-efficient of variation over last six years

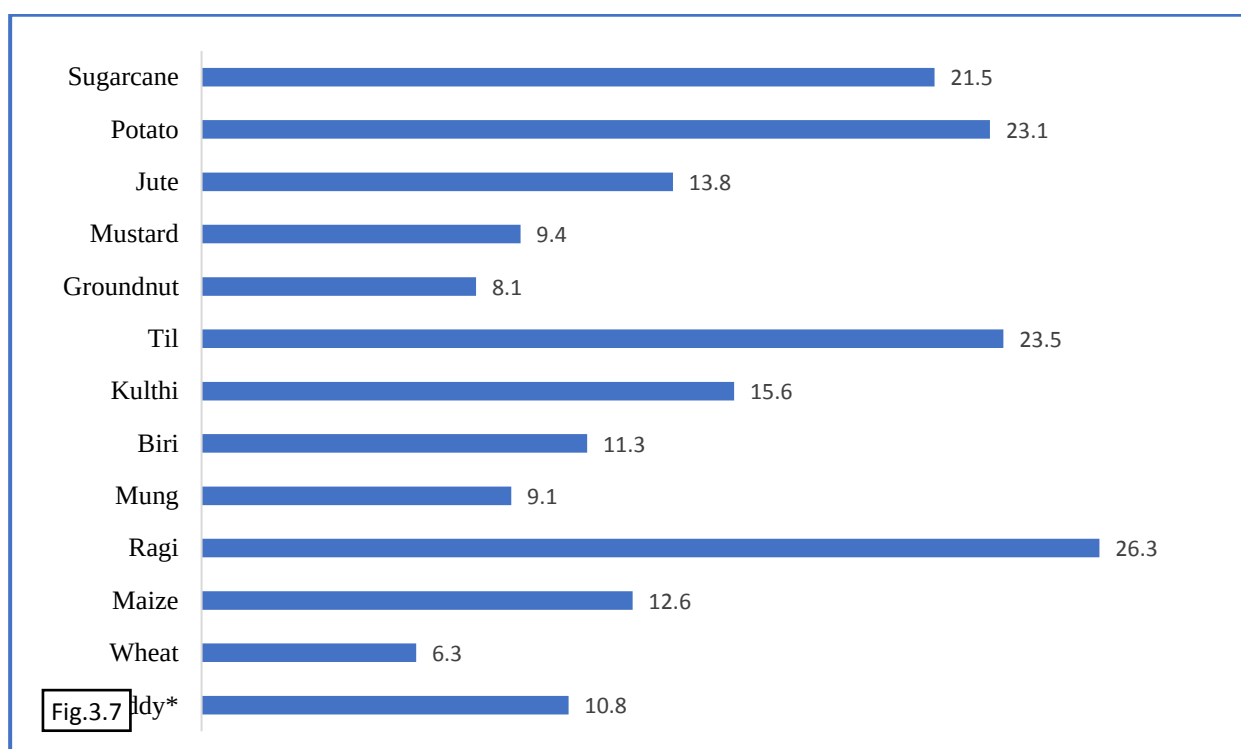

Crop	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	Growth rate	% CV
Paddy*	1310.0	1360.0	1411.6	1470.0	1553.2	1750.0	33.6	10.8
Wheat	1562.0	1604.7	1612.6	1702.8	1776.9	1828.0	17.0	6.3
Maize	1230.0	1302.9	1466.6	1526.7	1576.6	1741.5	41.6	12.6
Ragi	1482.9	1554.7	1782.4	1917.0	2069.8	2899.9	95.6	26.3
Mung	4971.2	5644.6	6149.0	6360.6	6374.5	6065.4	22.0	9.1
Biri	4480.3	5123.1	5954.6	6043.9	6023.0	5637.3	25.8	11.3
Kulthi	2503.8	2865.7	3225.1	3292.3	3504.3	3957.9	58.1	15.6

** Provisional figures*

The annual state average wholesale prices of the major thirteen agricultural commodities for the years 2013-14 to 2018-19 along with their growth and Co-efficient of variation (a measure of standard deviation) over last six years is placed at Table-8. The analysis shows that there has been rise in the rate of growth in wholesale prices for all commodities during the period. Paddy reported 33.6% growth rate of wholesale price. Ragi shows the maximum rate of growth with 95.6% followed by Til 91% and Sugarcane 84.8%. Potato also exhibited about 47% growth from 2013-14 to 2018-19.

The detailed CV percentages of cereal, pulses and oil seeds and others major crops are presented in fig-3.7 below.

Co-efficient of variation over last six years

3.3 District Average Wholesale Prices

The data on wholesale prices of major crops have been collected by this directorate from 116 primary markets selected on a purposive basis during the harvest period of six to eight weeks. Then the fortnightly prices were combined into district averages through their simple arithmetic mean.

In case of the principal crop of the state i.e, Paddy, since majority of the produce are sold out in mandies by the farmers in MSP through procurement by state government, no inter-district variation is noticed as far as wholesale price is concern. However, for all other major crops, it is clearly visible. Table-9 shows district wise percentage growth of annual average wholesale price of some major crops of Odisha over the period from 2013-14 to 2018-19.

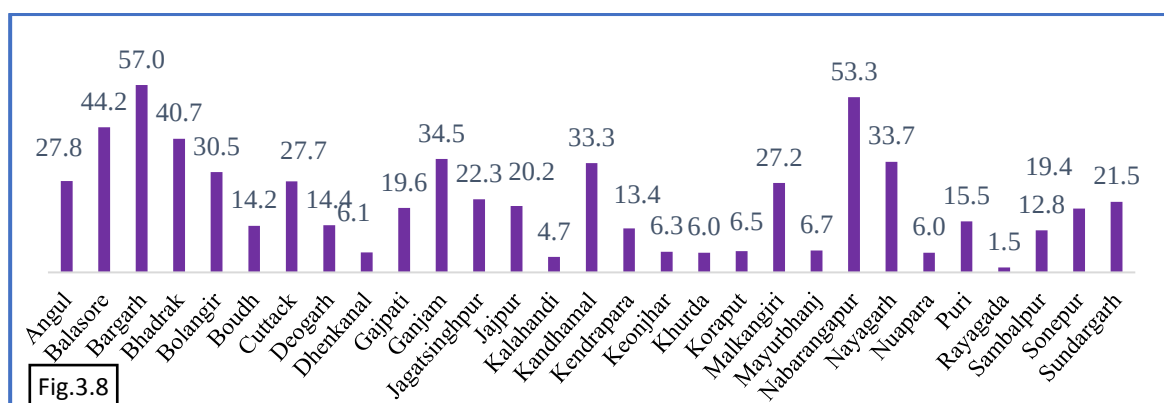

Figure 3.8 depicts growths of annual average wholesale prices of paddy for all the thirty districts of Odisha.

Table-9: Percentage growth of District Average Wholesale Prices of Paddy, Mung, Biri, Kulthi and Groundnut over last six years.

Dist name	Mung	Biri	Kulthi	Groundnut
Angul	27.8	17.9	62.1	32.6
Balasore	44.2	32.9	102.0	25.9
Bargarh	57.0	59.3	41.3	58.1
Bhadrak	40.7	30.9	77.1	26.2
Bolangir	30.5	38.6	33.7	54.7
Boudh	14.2	-1.9	84.7	9.3
Cuttack	27.7	14.6	52.1	12.7
Deogarh	14.4	12.9	35.6	-
Dhenkanal	6.1	11.3	54.6	1.2
Gajapati	19.6	33.8	96.6	37.8
Ganjam	34.5	31.9	109.6	33.6
Jagatsinghpur	22.3	13.6	75.6	45.5
Jajpur	20.2	19.9	124.0	6.1
Jharsuguda	-	42.1	48.6	24.3
Kalahandi	4.7	27.1	35.0	20.3
Kandhamal	33.3	31.4	55.5	23.3
Kendrapara	13.4	24.3	36.6	26.6
Keonjhar	6.3	12.3	50.8	-
Khurda	6.0	12.5	26.1	26.3
Koraput	6.5	40.9	114.9	26.6
Malkangiri	27.2	47.0	85.9	22.9
Mayurbhanj	6.7	8.3	46.6	18.3
Nabarangapur	53.3	45.2	62.3	16.4
Nayagarh	33.7	14.8	12.8	31.1
Nuapada	6.0	31.1	64.4	37.9
Puri	15.5	25.2	7.9	14.3
Rayagada	1.5	29.3	20.0	36.4
Sambalpur	12.8	25.5	48.3	18.7
Sonepur	19.4	5.4	29.2	20.6
Sundargarh	21.5	41.6	92.3	36.1

3.3.1 Mung

Growth of Mung over 6 years (2013-14 to 2018-19)

The figure-3.8 depicts the growth of Annual district average Wholesale prices of Mung from the year 2013-14 to 2018-19. It is observed from the figure that among the districts, Baragarh reported the highest increase with 57% followed by Nabarangapur (53.3), Balasore (44.2), Bhadrak (40.7) and Ganjam (34.5). These districts constitute the top five group in the state regarding rise in Mung price. Rayagada occupied the bottom most position with a concerning low rise of only 1.5% over a six-year long gap.

3.3.2 Biri

Growth of Biri over 6 years (2013-14 to 2018-19)

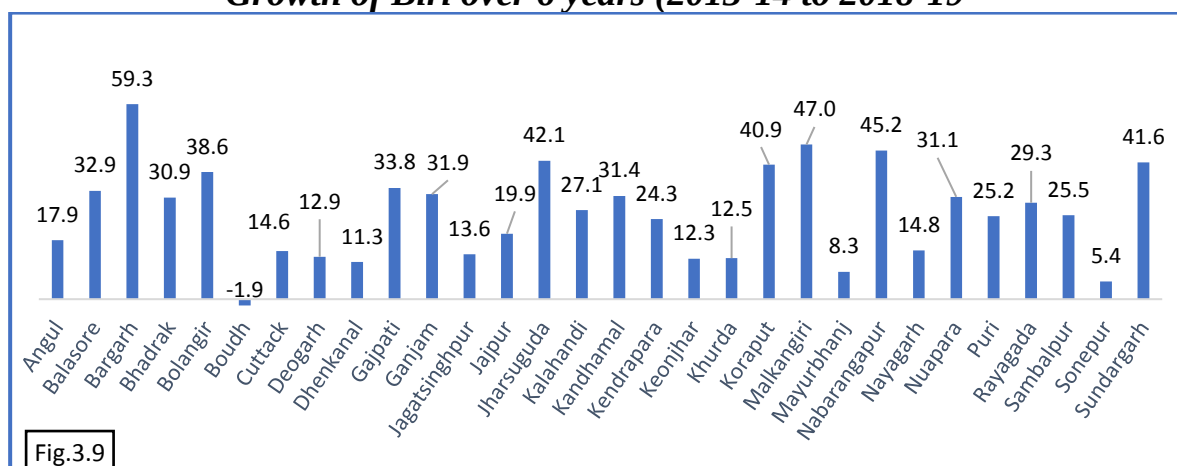

Fig.3.9

The Wholesale prices for Biri has risen significantly over the past six years for almost all the districts (fig-3.10). The growth rate is more than 59 per cent for Bargarh over the entire period (2013-14 to 2018-19). Malkangiri (47.0%) and Nabarangapur (45.2%) districts also have shown significant rise in this regard. Boudh reported decline of -1.9%. Sonepur and Mayurbhanj are the only districts which report single digit growth rates.

3.3.3 Kulthi

Growth of Kulthi over 6 years (2013-14 to 2018-19)

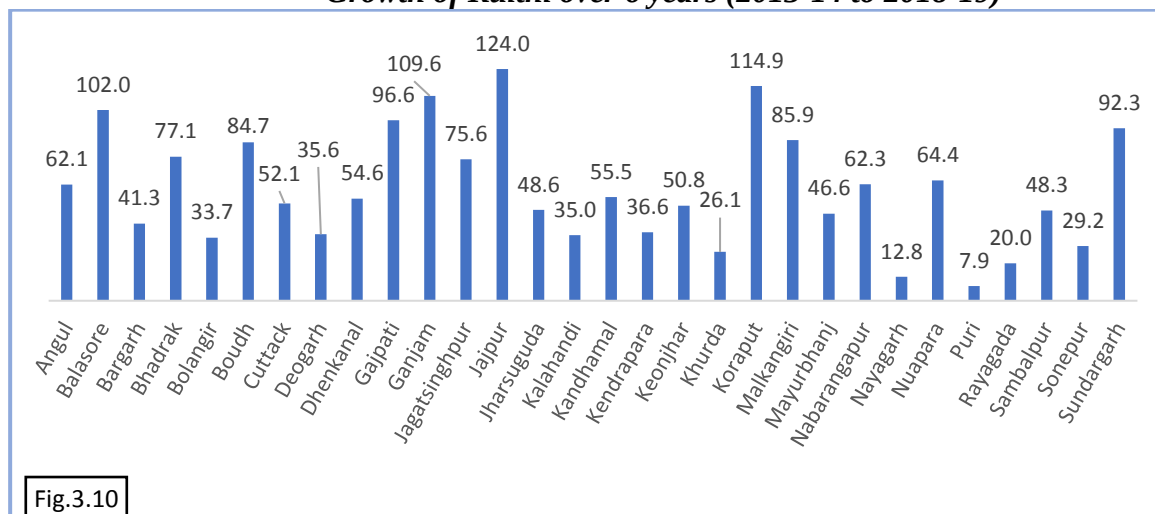

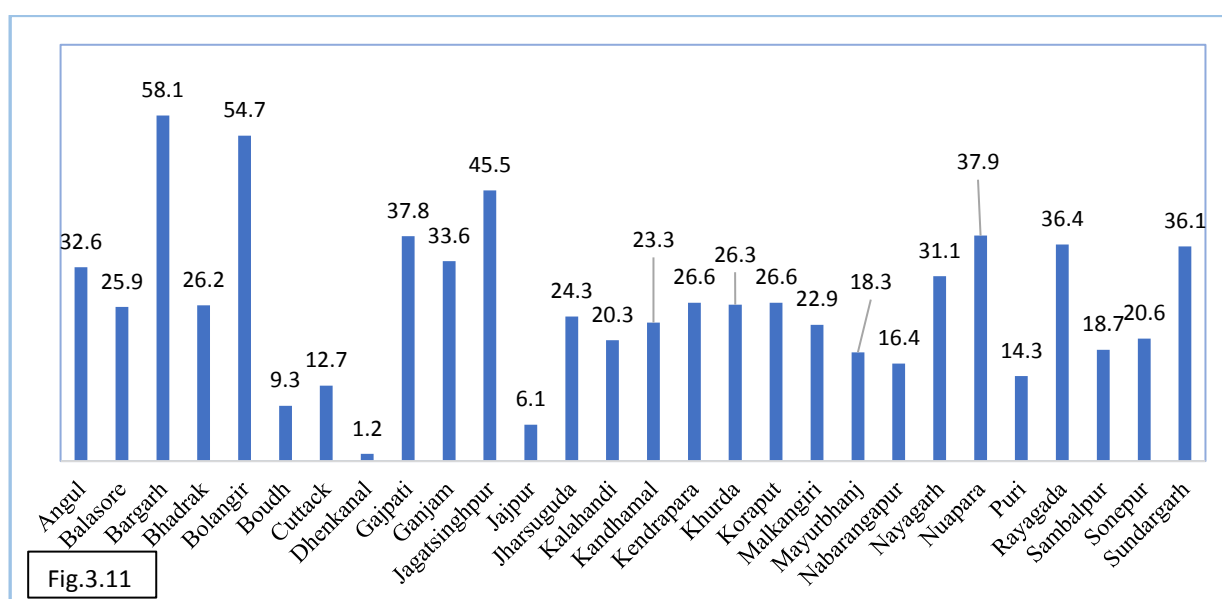

Fig.3.10

The district average farm wholesale prices and growth rate of Kulthi in all the major producing districts of Odisha for the years between 2013-14 and 2018-19 is provided in Table 20 (List of Tables). The districts of Jajpur, Koraput, Ganjam and Balasore are observed to report substantial growth at three digit rates while the rate of increase is lowest for Puri (about 8%) through time. Fig-3.11 is the lucid representation of the fact.

3.3.4 Groundnut

Growth of Groundnut over 6 years (2013-14 to 2018-19)

Bargarh reported more than 58% growth from 2013-14 to 2018-19 in the wholesale price of Groundnut. Almost all the districts shown notable temporal change. Dhenkanal is as the district which shows minimal growth rate (1.2%). Figure-4.12 represents the district-wise growth rate over past six years in Odisha.

CHAPTER IV

Livestock, Livestock Product & by-product

Agriculture is the prime source of livelihood for a majority of rural population but Livestock is an omnipresent economic resource for the poor people. Rural household estimates several types of livestock such as Dairy, Poultry & Fishery. Livestock farming is fostering of animals for food and for several other human uses. The word 'Livestock' primarily refers to cattle or dairy cows, chicken, goats, pigs, horses and sheep.

In Odisha livestock sector is an undisputed part of agriculture and has a significant part in the whole economy which provides employment, income for the State. This sector's growth not only attributed by the increase in the production of milk, eggs & meat but overall development of livestock by its progeny development, diseases control and related infrastructure etc. Increasing incomes, fast rising urban population, and globalization of agricultural food markets are opening up new opportunities for faster growth of livestock sector.

The Directorate of Economics and Statistics is collecting the data on prices of different categories of Livestock, Livestock products, Milk & Milk products and Livestock Feed from the district headquarters.

- i) Only one selected Cattle Market is covered under collection of Producers' prices of Animals & Birds (Schedule-4) in each district. A list of Cattle Markets (district wise) is given in **Annexure III**.
- ii) Only one Centre i.e. District Headquarters is covered under the collection of Producers' prices of Milk & Milk product, Meat, Fish & Egg (Schedule-5) in each district.
- iii) The Producers' prices of Animal product & By-product are also collected (Schedule-6) from the district headquarters of the State.
- iv) The Wholesale prices of cattle feed (Schedule-7) are being collected from the district headquarters of the state.

These State Average Prices are used by the State Income Unit, Directorate of Economics & Statistics, and Odisha for estimation of GSDP of Odisha.

4.1 Producers Price of Livestock, Animals and Birds

The price data pertaining to the producers' prices of different cattle & birds are being collected in respect of 41 items from the 30 selected cattle markets (one market from each district) up to the agricultural year 2015-16. From 2016-17 onwards data are being collected in respect of 54 items from the same selected cattle market from each district.

Table-10 Annual State Average Prices of Animals and Birds in Odisha (in Rupees)

Item	Specification	2013-14	2014-15	2015-16

Table-11 depicts the overall growth rates of the Annual State Average Producers' Prices of Meat, Fish, Egg and Milk & Milk Products from the year 2013-14 to 2018-19. Here, it is observed that the percentage growth of animal product like sheep meat has increased by 36.75% at the end of 2018-19 as compared to the year 2013-14 which is the highest increasing trend in growth as compared to other animal meats namely pig (34.74%), goat (34.53%), chicken (18.55%) and beef (7.28%). On the other hand, all other items are also showing the positive amount of growth in the aforesaid years. The average prices in respect of fish (fresh water) of big size & small size are showing growth rates of 18.86% & 3.46% and fish (saline water) of big size & small size are showing growth rates of 29.29% & 10.16% respectively. Similarly, the average prices in respect of egg (hen local), egg (hen improved), egg (duck) are showing the growth of 44.36%, 15.02% & 64.50% respectively in these years.

The milk and the milk products are also in the way of increasing trend for example, the growth of cow milk and buffalo milk have become 40.00% & 58.92% respectively. Besides, so far as the percentage growth of the fats of slaughter animals are concerned, fats of pig has increased by 127.82% which is the highest growth than others during the said period where as fats of slaughter animals like goat & sheep have shown 42.91% & 16.78% growth respectively.

4.3 Producers Price of Animal By-Products

Table-12 Annual State Average Producer Prices of Animal By-Products in Odisha (in Rupees)

The table-13 reflects the Annual State Average Wholesale Prices of different cattle feeds, molasses (gur), salt etc. from the year 2013-14 to 2018-19 along with their overall growth rates in respect of Odisha. From the table, it is observed that the growth of the bran (nada) shows the highest percentage i.e, 187.46% followed by gram (80.44 %), oil cakes (56.43%), crushed pulses (51.95%), salt (42.55%), molasses (35.30%) and grain (20.13%) in the last six years. From the table, it may be concluded that all the cattle feed items have increased every year during the said period except husk (kunda) where there is a negative growth.

Annexures

Concepts & Definitions

1. Farm Harvest Price

Farm Harvest Price is the average price at which the commodity is disposed off by the producers in bulk quantities **at the village site** during the specified harvest period i.e. **within 6-8 weeks of harvest**. The prices should be invariably quoted for the commodities transacted between the producers and the traders in the village site. The efforts should be made to collect the price actually received/ would have been received by the producer in the feeding village.

2. Wholesale Price

Wholesale price is the price at which a relatively large transaction usually for further sale is effected by the wholesaler. This includes the trade margin and transportation cost paid by the wholesaler. The collection of these prices will be made in the primary market centre itself from the traders involved in the transaction of bulk commodities.

3. Selection of Primary Markets

116 Primary Markets @ 2 per Subdivision on random basis out of the important markets having superiority over other markets from the point of view of transaction of agricultural produce have been selected for the state covering 30 districts. The Directorate has adopted the procedure simple random sampling for selection of two markets in each sub-division.

4. Selection of Feeding Villages

One feeding village preferably nearer to the Primary Market having the variety of crops growing area and transaction of Marketable surplus with strong agricultural base has been selected for each Primary Market for collection of Farm Harvest Price & Producer's price. In this process 116 feeding villages have been selected covering thirty Districts of the State and these 116 feeding villages are tagged with 116 primary markets. The detail list of district wise primary markets along with feeding villages is given in **Annexure-2**.

5. Village Site

It is the place of production of crop or place of normal storage by the producer. The village site constitutes the selected Primary Markets and adjacent feeding villages of the market. This may also include the nearby Mandy, Haulers, Rice Mills, Oil Mills, Atta Mills, Dal Mills and other processing units. Some adjustment should be made in prices to uphold the real meaning of concept.

6. Peak Marketing Period

Peak Marketing period is the period during the year at which most of the producers generally dispose off their produces. Usually this is the period of six to eight weeks after completion of the harvest during which farmers are generally expected to dispose off their produce. It varies from district to district.

7. Producers Price

Producer's price is the average price at which the commodity is disposed off by the producers in bulk quantities at the village site or at the selected Primary Market during the specified **peak marketing period i.e within a time lag of 2 months after the harvesting period**. Bulk transaction actually take place during the peak marketing period rather than the harvesting period, there being a time lag of two months. But in case of perishable items, the peak marketing period take place during the harvesting period. Therefore the prices of perishable items should be considered as Farm Harvest Price if it is collected at the village site & Producers' price if collected from the primary market.

8. Average Price

Here average means modal average. So Average price means the price at which the maximum producers of the locality dispose of their produces. Average price implies the average price of a particular variety of produce and not the average prices of different varieties of a produce. When the price data are collected from the primary markets, the average wholesale price at which most producers dispose of during peak marketing period (peak transaction period) of the market is to be quoted.

Name of the Locations	Price of Brinjal (Rs. Per K.g.)
Location 1	10
Location 2	20
Location 3	10
Location 4	12
Location 5	15
Location 6	12
Location 7	16
Location 8	12
Location 9	17
Location 10	12

For Example: Suppose there are 10 (ten) Locations selling Brinjals in a Particular market on the market day and the selling prices of Brinjals in these locations are as follows:-

Here the modal average price of Brinjal is Rs. 12/- per kg in that particular market of that day.

9. Collection of Price Data along with Periodicity

The following prices from selected Primary Market / Feeding Village in the prescribed schedule as per the periodicity mentioned against each are to be collected.

Sl. No.	Type of Prices to be collected	Source of Collection	Periodicity	Schedules to be used
1	2	3	4	5
1	Farm Harvest Price	Selected Feeding Village	Fortnightly 2 nd & 4 th week)	Sch. 1 (Market day of
2.	Producers' Price	Selected Feeding Village/ Primary Market	Fortnightly 2 nd & 4 th week)	Sch. 1 (Market day of
3.	Wholesale Price of Agri. Commodities.	Selected Primary Market / Mandies, Gaddies etc.	Monthly (Last market day)	Sch. 2
4.	Rural Retail Prices	Selected Primary market / near by locality	Monthly	Sch. 3 (Last market day)
5.	Urban Retail Price	Selected retailers / Market of dist. Hqrs & selected Industrial towns. (i.e. Rourkela, Badbill, Sunabeda & NALCO Nagar, Angul)	Monthly (Last market day)	Sch. 3
6.	Producers' price of Livestock animals and birds.	Selected Cattle Market.	Monthly (Last market day)	Sch. 4
7.	Producers' Price of Livestock Products & By-product.	Leading Butchers & Other traders of dist.hqrs..	Monthly	Sch. 5 & 6
8.	Wholesale Price of Cattle feed.	Selected Wholesalers of the dist. hqrs.	Monthly	Sch. 7

10.State Weighted Average Farm Harvest Prices

Farm Harvest Price is defined as an average price at which the commodity in bulk is disposed of by the producer at the village site during the specified harvest period. Farm Harvest Price is being collected within 6-8 weeks of harvest for both Kharif and Rabi Seasons. These prices are collected in respect of all the agricultural crops produced in the state. Out of those, the major thirteen Agriculture Commodities are 1.Paddy, 2.Wheat, 3.Maize, 4.Ragi, 5.Mung, 6.Biri, 7.Kulthi,8.Til, 9.Mustard, 10.Groundnut, 11.Jute, 12.Potato and 13.Sugarcane.

The State Weighted annual average Farm harvest prices of the agricultural crops are being calculated by giving their district-wise production as the weights and are used by the State Income Unit, Directorate of Economics & Statistics, Odisha for estimation of GSDP of state.

11. State Weighted Average Wholesale Prices

Wholesale price is the price at which a relatively large transaction usually for further sale is effected by the wholesaler. This includes the trade margin and transportation cost paid by the wholesaler.

The collection of these prices are made in the primary market centre itself from the traders involved in the transaction of bulk commodities. The Wholesale Prices for thirteen major Agriculture Commodities received from Primary market centers of the districts are being scrutinized and State weighted Average of Wholesale Prices are worked out regularly by the Directorate of Economics & Statistics.

12. Producers Price of Livestock, Animals and Birds

The price data pertaining to the producers' prices of different cattle & birds are being collected in respect of 41 items from the 30 selected cattle markets (one market from each district) up to the agricultural year 2015-16. From 2016-17 onwards data are being collected in respect of 54 items from the same selected cattle market from each district.

The following guide lines are followed at the time of data collection:

- i. The investigator should reach the cattle market before the peak- period of the market.
- ii. The investigator should contact the sellers, purchasers and the middleman and gather information on the price at which the animals & birds of different varieties are sold, so that he could knowledge on the price quoting behavior of sellers, purchasers and the middleman etc. This knowledge would certainly help in quoting quality price.
- iii. Price should always be quoted for animals and birds having average height, and weight/health. The price of too healthy, too high, too weak and too short animals should not be quoted at all.
- iv. The standard/ specification of animals and birds, for which price has been quoted, should be kept constant in successive months. If the standard/ specification changes, then it will not be possible to know whether the price change is due to change in price or due to change in standard/ specification. As the objective of our price collection is to know the price changes, sufficient care should be taken to quote prices of a particular standard/ specification.
- v. The price should always relate to the price actually received by the producer of animals and birds. It is observed that in some cases the seller is not the actual producer. In such cases, the investigator will contact the seller and ascertain the price at which he had purchased from the producer and quote that price in the schedule. In cases, where the seller is the producer, the investigator should contact the producer-seller, the purchasers and the middleman, if any and ascertain the actual price at which the animal or bird is sold.
- vi. It is generally observed that, the hybrid /improved variety of animals and birds are not marketed in the cattle market, due to non-availability in the feeding region or due to sale at home site of the producer. In such cases, the investigator should collect the information by enquiry method from any reliable source and quote the same in the schedule indicating in the remark column 'E' which will mean that the price has been quoted through enquiry method.
- vii. When the deviation of prices, in relation to the prices of the previous month is more than 20% then a satisfactory reason in this regard, must be given in the remark column.

- viii. Price quoted should always be the modal price, prevailing in the day of collection.

13. Prices of Fish, Meat, Egg, Milk and Milk Products

Schedule-5 is meant for collection of producers' prices of different fish, meat, egg, milk, & milk products. This data is collected in respect of 41 items from the selected Shops of each district headquarters.

The following guide lines are followed at the time of data collection:

- i. These prices will be collected from the leading sellers of the Meat & Fish market of the district headquarters.
- ii. The Butchers will be treated as the producers' of Meat, Meat products & by-products. The prices quoted by the leading Butchers are to be collected for these items.
- iii. As is observed, in the Meat Market, the Butchers for pig, cow& buffalo, may not be available. In such cases, the investigator should collect the prices from the 'slaughter house' situated within or near the geographical boundary of the district headquarters or any other source suitable to him. The source identity should be given in remark column.
- iv. If there is slaughter house in the district, but is not nearer to the district headquarter, then he may collect the prices through enquiry and mention in the remark column E.
- v. It is observed that, in the fish market, the seller are not always the producers. They are generally wholesalers or/and retailers. So it may not be possible to collect prices of fish and eggs of different varieties from the producers always. So the investigator should collect wholesale/retail prices for these items from the producers or traders as the case may be mention the type of price (producers/wholesale/retail) quoted in remarks column.
- vi. For the items relating to milk &milk products, the investigator should collect the prices from the leading producers, available within the geographical boundary of the district headquarters, They may also collect those prices from the leading "sweet stalls" or any other place, where the producers, regularly supply these items and quote the prices subtracting transportation charge, profit etc. involved if any to obtain the producers' price. For the collection of wholesale price the above charges are not to be subtracted.
- vii. If prices for any item is not at all possible to collect then N.C. (Not Collected) may be mentioned.

14. Producers Price of Animal By-Products

Schedule-6 is meant for collection of producer prices of Animal bi-Products. This data is collected in respect of 19 items from the selected shops/ nearby slaughter houses (one selected centre for each district) of district headquarters. The average prices should be quoted from the selected shops of the district hqrs.in respect of 1st month, 2nd month & 3rd month of the Quarter respectively and the quarterly average to be prepared at DES level.

At the time of data collection the following guide lines should be referred:

- i. For some items like, Bones, skin etc. there are depots in the district. The investigator may collect the prices of these items from the depots either directly or through enquiry and source identify should be given in remark column.
- ii. The prices of hides and skins differ significantly depending on shape & sizes. So there is possibility of large oscillation in time series data. So standard size has been fixed prior to data collection for hides & skins.
- iii. If prices for any item is not at all possible to collect then N.C. (Not Collected) may be mentioned.

15. Wholesale Price of Cattle Feed

Schedule-7 relates to month wise collection of wholesale prices of different cattle feed in respect of 20 items from the selected wholesale price shops (one shop for each district) of the district headquarters. The modal average wholesale prices should be quoted from the selected shops of the district hqrs. in respect of 1st month, 2nd month & 3rd month of the Quarter respectively and the quarterly average to be prepared at DES level.

At the time of data collection the following guide lines should be referred:

- i. These prices should be collected from the selected shops of the districts.
- ii. If prices for any item is not at all possible to collect then N.C. (Not Collected) may be mentioned.
- iii. When the deviation of prices, in relation to the prices of the previous month is more than 10% then a satisfactory reason in this regard, must be given in the remark column.
- iv. The price data should be collected for the last market day of every month. There must be more than 14 days duration between the two market days.
- v. The investigator should maintain conversion factors in respect of each item which are not sold in standard units.
